## DETAILED ACTION

### *Election/Restrictions*

1. Claims 6 – 15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2 September 2005.
2. Applicant's election without traverse of Group I in the reply filed on 2 September 2005 is acknowledged.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 – 5 and 16 – 20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 - 11 of U.S. Patent No. 6,740,549 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would be obvious that a nitride-capping layer could be a hardmask layer.

Art Unit: 2823

4. Claims 1 – 5 and 16 – 20 of the present invention are generic with respect to the patented claims 1 – 11 of the US Patent No. 6,740,549 B1. A species claim anticipates a generic claim; therefore, the patented claim anticipates the examined claim. See MPEP 806.04 (i).

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(f) he did not himself invent the subject matter sought to be patented.

6. Claims 1 – 5 and 16 – 20 are rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter. Application 09/927,604, which is U. S. Patent 6,740,549 B1; is the parent case of the present Application. However, U. S. Patent 6,740,549 B1 has a different inventive entity, at least two of the inventors in the parent case are not mentioned in the present Application. Since, the present Application's claims are generic to the species claims patented in the parent Application as noted above, therefore, both cases should have the same inventive entity.
